Career Objective

Motivated Electronics and Communication Engineering student seeking opportunities to develop technical skills, gain practical experience, and contribute to innovative engineering projects.

Education

B.E. in Electronics and Communication Engineering **2025–2029**
Adichunchanagiri Institute of Technology, Chikkamagaluru, India **CGPA: 8.3**

Skills

- **Programming:** C Programming
- **Technical:** Arduino, Basic Electronics, Sensors
- **Core Area:** Electronics and Communication Engineering

Projects

Smart Gas Leakage Detection and Automatic Ventilation System
Arduino Uno *— Gas Sensor — Automatic Ventilation*

- Developed a smart safety system for detecting gas leakage and automatically activating ventilation.
- Integrated a gas sensor with an **Arduino Uno** to monitor gas leakage and control the ventilation mechanism.
- Designed a prototype to improve safety by providing an automatic response when gas leakage is detected.

3D Animated Video
3D Design — Animation — Visual Communication

- Created a 3D animated video as a creative and technical project, focusing on visual design and animation.

Achievements

- Successfully completed academic and interdisciplinary engineering projects as part of B.E. coursework.

Additional Information

- Interested in electronics, embedded systems, and communication technologies.
- Eager to learn new technologies and gain practical engineering experience.
